Dear Kevin,

I am writing to acknowledge your role in the design and construction of the Pictou Landing Health Centre, which was recently designated as 2010 International Building of the Year by the Chicago Athenaeum: Museum of Architecture and Design and The European Centre for Architecture Art Design and Urban Studies.

In your role as Project Manager with Pictou Landing First Nation, you were instrumental in all aspects of realizing the project including preparation of contract drawings, on site training of local workers, and managing relationships with client groups, consultants and contractors. I can say with certainty that the project would not have been realized without your involvement, and that after the project was completed you had the utmost respect of all those concerned in the process.

I will continue to look for opportunities for future collaboration and highly recommend you to any clients or consultants who are seeking to achieve excellence.

Yours truly,

A handwritten signature in black ink, appearing to read 'Richard Kroeker', written in a cursive style.

Richard Kroeker BES, AA Dip., ARUK
